# Run report

Insights Hub – Access review 1: flag inactive users

## 1. Summary

PROCESS
Insights Hub – Access review 1: flag inactive users

VERSION
1

RUN ID
`run_x_NRHXPJ2C-y`

STATUS
Succeeded

TRIGGER
Manual

STARTED BY
Fixture Admin (admin)

STARTED
05/11/2026, 21:46:54 CET

FINISHED
05/11/2026, 21:46:55 CET

DURATION
157 ms

DRY RUN
No

DEFINITION HASH
`4e1df380578a11491527b6e0e71b42e07dd95bc40f47ef19e78f45c0d78c5544`

### About this process

Phase 1 of the user housekeeping procedure. Lists all users, finds those who have not logged in for the configured number of days and – after you confirm the selection – adds them to a review group (e.g. mdsp_usergroup:AccessReview). Run "Access review 2" later to decide who keeps access.

Note: the last-login attribute lastLogonTime is returned by the Insights Hub user API but is not part of the official spec. Verify it with a dry run on your tenant and adjust the "Determine inactive users" step if needed.

Recommended schedule: quarterly (0 7 1 1,4,7,10 *), followed by "Access review 2" two to four weeks later.

### Platforms used

| Connection slot | Platform | Kind | Environment |
|---|---|---|---|
| `hub` | Insights Hub (demo) | `insights-hub` | demo |

### Inputs

| Input | Value |
|---|---|
| Days without login (inactiveDays) | `90` |
| Review group (display name) (reviewGroup) | `mdsp_usergroup:AccessReview` |
| Include users that never logged in (includeNeverLoggedIn) | `true` |
| Exempt users (user names, one per line) (exempt) | `[]` |

### Results at a glance

| 9 | 0 | 2 | 0 | 1 | 0 | 1/1 |
|---|---|---|---|---|---|---|
| Steps executed | Failed steps | Changes made | Simulated changes | Checks passed | Findings (failed checks) | Decisions |

## 2. What was done

Every executed step in order, as recorded in the run journal.

| Time | Step | Type | Status | Result |
|---|---|---|---|---|
| 21:46:54 | Start | `start` | Succeeded | Run started |
| 21:46:54 | Resolve API paths | `set` | Succeeded | idm = /api/identitymanagement/v3 |
| 21:46:54 | List all users | `http` | Succeeded | GET /api/identitymanagement/v3/Users → 15 item(s) in 1 page(s) |
| 21:46:54 | Find review group | `http` | Succeeded | GET /api/identitymanagement/v3/Groups → 200 (2 ms) |
| 21:46:54 | Review group exists | `check` | Succeeded | ✓ Review group mdsp_usergroup:AccessReview: found |
| 21:46:54 | Determine inactive users | `set` | Succeeded | group = {…}, alreadyFlagged = 0, inactive = [7 items] |
| 21:46:54 | Confirm users to flag | `userTask` | Succeeded | adam selected 2 of 7 |
| 21:46:55 | Add selected users to review group | `forEach` | Succeeded | 2 item(s) |
| 21:46:55 | Add to review group | `http` | Succeeded | POST /api/identitymanagement/v3/Groups/70c24e9e-f539-03a8-0699-b1596b7d46e3/members → 201 (9 ms) |
| 21:46:55 | Add to review group | `http` | Succeeded | POST /api/identitymanagement/v3/Groups/70c24e9e-f539-03a8-0699-b1596b7d46e3/members → 201 (3 ms) |
| 21:46:55 | Summary | `report` | Succeeded | Users flagged for access review: 2 row(s) |

## 3. Changes (write operations)

Calls that create, change or delete data on a platform.

| Time | Step | Method | Request | Result |
|---|---|---|---|---|
| 21:46:55 | Add to review group | `POST` | `http://127.0.0.1:37841/mock/ih/api/identitymanagement/v3/Groups/70c24e9e-f539-03a8-0699-b1596b7d46e3/members` | HTTP 201 · Succeeded |
| 21:46:55 | Add to review group | `POST` | `http://127.0.0.1:37841/mock/ih/api/identitymanagement/v3/Groups/70c24e9e-f539-03a8-0699-b1596b7d46e3/members` | HTTP 201 · Succeeded |

## 4. Decisions and approvals

### Selection: Flag 7 inactive user(s) for access review

OUTCOME
2 of 7 selected

DECIDED BY
Adam Approver (adam)

DECIDED AT
05/11/2026, 21:46:55 CET

ASSIGNED TO
Anyone allowed to run or approve the process

COMMENT
Checked with HR – both left the company

These users have not logged in for at least 90 days. Selected users will be added to mdsp_usergroup:AccessReview. Untick anyone who should be left alone.

| Selected | User | Name | Last login | Days | Groups |
|---|---|---|---|---|---|
| ✔ | david.engel@example.com | David Engel | 2026-08-02 | 95 | mdsp:core:StandardUser, mdsp_usergroup:Operators, mdsp_usergroup:Viewers |
| ✔ | eva.fuchs@example.com | Eva Fuchs | 2026-07-08 | 120 | mdsp:core:StandardUser, mdsp_usergroup:Operators |
| – | felix.graf@example.com | Felix Graf | never | – | mdsp:core:StandardUser, mdsp:core:TenantAdmin, mdsp_usergroup:Engineers |
| – | hans.ilg@example.com | Hans Ilg | 2026-04-19 | 200 | mdsp:core:StandardUser, mdsp:core:TenantAdmin, mdsp_usergroup:Engineers |
| – | karla.lang@example.com | Karla Lang | 2025-10-21 | 380 | mdsp:core:StandardUser, mdsp_usergroup:Engineers |
| – | mia.neumann@example.com | Mia Neumann | 2026-08-06 | 91 | mdsp:core:StandardUser, mdsp_usergroup:Operators |
| – | noah.otto@example.com | Noah Otto | never | – | mdsp:core:StandardUser |

## 5. Checks

| Result | Check | Severity | Message |
|---|---|---|---|
| Passed | Review group exists | Error | Review group mdsp_usergroup:AccessReview: found |

## 6. Results reported by the process

### Users flagged for access review

- Users checked: 15
- Already in review group: 0
- Inactive candidates (>= 90 days): 7
- Flagged now: 2

| User | Last login |
|---|---|
| david.engel@example.com | 2026-08-02 |
| eva.fuchs@example.com | 2026-07-08 |

## 7. Evidence

No evidence files were recorded.

## 8. Errors

No errors were recorded.

## 9. Comments

### Reviewer comment

FIXTURE ADMIN (ADMIN) · 05/11/2026, 21:46:55 CET

### Comments on decisions

| Decisions and approvals | Decided by | Decided at | Comment |
|---|---|---|---|
| Flag 7 inactive user(s) for access review | Adam Approver (adam) | 05/11/2026, 21:46:55 CET | Checked with HR – both left the company |

## 10. Integrity and verification

JOURNAL INTEGRITY
Intact – unchanged since the run finished

SEALED PROTOCOL HASH (RECORDED WHEN THE RUN FINISHED)
`7d96411787e58523af021c4fb855a01eb32d6fc7bd97063c820190bf4fafccef`

PROTOCOL HASH AT REPORT GENERATION
`7d96411787e58523af021c4fb855a01eb32d6fc7bd97063c820190bf4fafccef`

REPORT CONTENT HASH
`3d0687fc14058397e92d8b30b836c6e357d6c37245d3206caf4a2d75560360f7`

REPORT ID
`rpt_NcTw7FJDoTt0`

RUN ID
`run_x_NRHXPJ2C-y`

### How to verify this document

1. Compute the SHA-256 of this PDF file and compare it with the value in the audit log entry “report.generated” for report rpt_NcTw7FJDoTt0. Signing adds an incremental update: for a signed copy, hash only as many leading bytes as the size recorded in the same entry.

2. Verify the audit chain (Audit log → Verify chain, or GET /api/audit/verify). A valid chain proves that the recorded hash has not been altered.

3. The protocol hash printed in the footer is the sealed fingerprint of the run journal; the run page shows whether the journal is still intact.

### Audit trail of this run

Entries of the HMAC-chained audit log for this run. Any later change to these entries is detected by “Verify chain”.

| # | Time | Actor | Action | Summary | Entry hash |
|---|---|---|---|---|---|
| 271 | 05/11/2026, 21:46:54 CET | admin | `run.started` | Run of "Insights Hub – Access review 1: flag inactive users" v1 started (manual) | `129d23f37634cfc4…` |
